- After restarting in the advanced mode, a screen will come up with two options. Select the ‘**Troubleshoot**’ option.
- When the ‘**Troubleshoot**’ option is selected, another window will appear. Find and click the option that says ‘Advanced options’.
- In the advanced options window, select the ‘**Startup settings**’ option.
- Inside the ‘**Startup settings**’ window, a list of selectable boot options will appear. chose disable driver signature enforcement.( press the [7] on keyboard)
- Once you’ve selected the option to disable driver signature enforcement reboot back into windows .

### 3. Run setuptopall8.exe.

Next step... Until completion.

## Windows7

## 1. Change to Administrator

- Go to Start.
- Select Control Panel
- Go to User Accounts.
- Click "Manage Another Account".
- Select the account you want to manage.
- Click "Change account type".
- Tick the administrator option.
- Click "change account type" to implement the changes.

## 2. Run setuptopall8.exe.

Next step... Until completion.

Normal after the setup is complete, (do not disconnect the programmer) can be found in device manager:

```
Top-win32 devices
├── TopAll_x
```

If you can not find these two lines, you can re load the USB driver:

Use the right mouse button to select "run as administrator":

C:\Topall\_ver8\Driver\ Load\_Usb.bat
